

InvisiGrip

A translucent hanger solution for the discreet suspension of signage, decorations, acoustic panels, lighting and displays.

Discreet – translucent hanger and filament ensures suspension blends into surroundings and creates illusion of 'floating' displays

Versatile – ideal for retail signage, product displays, lighting, decorative features and acoustic panels

Easy – innovative twist release mechanism allows the user to simultaneously adjust the position of the hanger, as well as the products suspended, in one simple movement

Fast – install and adjust in seconds, eliminating signage rails and complex assemblies

Ready-to-use – delivered as pre-made kits with your chosen end fixing and set length of filament, or as a DIY kit complete with InvisiGrip Hangers, a reel of InvisiGrip grade filament, and filament cutters

Safe – 5 kg Safe Working Load with a 5:1 safety factor
